

Mighty Mite Bike Rack

The Mighty Mite Bike Rack is made by Saris, a leading manufacturer of bike amenities. Click here for a description on Saris' website at: [Mighty Mite](#)

The Mighty Mite is a sturdy rack that holds six bikes but some organizations have chosen to bolt it down for extra security; all that's needed is a regular drill, a masonry bit and the appropriate sized concrete bolts (Facilities personnel should know what these are). If you don't want to bolt it to the ground other options are to lock the rack to a permanent part of the building structure with a heavy chain or assemble the rack through a couple of cinder blocks.

The rack will come in a box and requires assembly but it's quite simple.
